

CHILSON'S WORLD'S FAIR PRIZE MEDAL FURNACE.

This Patent Furnace, as recently improved, far surpasses all other modes of warming and ventilating public and private buildings, in the known world, it being in extensive use throughout the United States, and the Canadas, British Provinces, and other foreign countries. We have some 4700 references, many of them from gentlemen of high scientific attainments, which give ample proof of the superiority of this FURNACE

CHILSON'S PATENT TRIO STOVE.

SIX SIZES.

Any intelligent mind cannot fail to see the wonderful economy in the consumption of fuel by this invention, over the common Portable Furnaces. Immediately after the fire is kindled in the morning, the damper in the smoke-pipe is closed for the day; when the only escape for the heated smoke and gases is through the continuous tapering trunk, or radiator, terminating in the smoke-pipe, — which is reduced to a small vent of two inches in diameter. The heated smoke and gases are thus compressed into the whole circuit of the trunk, and become wholly exhausted by radiation. The consequence is, that the formerly wasted fuel, which was lost by passing off in smoke and gases in a crude or unconsumed state, is here made available for generating heat.

Warranted a Saving in Fuel of Fifty Per Cent. over any other Portable Furnace in the known world.

The Trio Stove embodies the same valuable principles combined in the Portable Furnace. We think no prudent person will use stoves, as they have formerly been constructed, after becoming acquainted with this invention. We obligate ourselves to prove, to the satisfaction of all, a saving of Fifty Per Cent. in Fuel, not only by seeing the stove in operation, but by a large number of the best testimonials that can be written.

As usual we offer a full assortment of

BOSTON MEDICAL & SURGICAL JOURNAL.

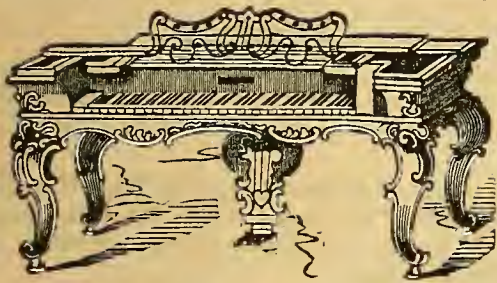

This well-known and long established Periodical will undergo some important changes on the commencement of the 52d volume in February, 1855. It will be issued weekly, as heretofore, from the office of Publication, over 184 Washington Street, Boston, but in its editorial management, the chief duties and responsibilities will devolve upon two physicians of the city, who have been selected as fully qualified by their literary tastes and scientific attainments to make the Journal acceptable to the profession generally. Aid has also been promised from many of the leading physicians of Boston, and it will continue to receive contributions from eminent members of the profession in every part of the country. Its contents, though mainly of a practical character, are intended to be sufficiently varied to make its weekly visits interesting as well as useful to the medical practitioner.

The price is THREE dollars a year, payable in advance. Orders by mail, with subscription money enclosed, may be addressed, as above, to

WHEELER & WILSON'S FAMILY SEWING MACHINES.

These improved Machines are rapidly coming into general favor, and acknowledged to be the ONLY machines adapted to family use. The beauty and durability of their stitching are unrivalled, working equally on fine cambric, quilting and heavy broadcloth. The rapid and noiseless operation of these machines is an advantage possessed by no other, while their simplicity of construction renders them easier of use, besides being less liable to get out of repair,—an objection reasonably urged against all other machines. To Families, Shirtmakers, Tailors, Milliners, &c., one of these machines is invaluable. Specimens of work furnished at any time where the machines are in operation, and for sale, at

PREFACE.

The liberal patronage extended to the Massachusetts Register, has induced the publisher to use extra exertions to perfect it in every department, and to make it, as its name imports, a complete index to the government and institutions of the State.

For a comprehensive view of the various subjects mentioned in this, the eighty-ninth number of the Register, we refer the reader to the copious list of contents on the next succeeding pages.

The work is usually issued in the month of January, or soon after the organization of the Legislature, of which body a list of names is given, together with the several State officers and legislative committees.

Our thanks are due to our correspondents for their prompt and valuable assistance, and also to our patrons throughout the State for their generous encouragement.

The attention of inventors, mechanics and manufacturers is invited to the work as a valuable medium for giving public notice of their various enterprises. All articles or notices intended for the next number should be addressed to the publisher on or before the 1st of December, 1855.

MASSACHUSETTS LEGISLATURE.

The session of the General Court for the year 1854 was begun at the State House, in Boston, on Wednesday, the fourth day of January—being the first Wednesday—at eleven o'clock in the forenoon, and was prorogued on Saturday, April 29. At this session, 454 Acts and 86 Resolves were passed—being 32 more Acts and 13 less Resolves than were passed at the next preceeding session.

The titles of the Acts and Resolves below are given *in full*, accompanied by an abstract of their provisions. The letter [G] is placed before such as are designated as *General* Acts and Resolves by the Secretary of the Commonwealth. The numbers placed before the titles show the order of their approval by the Governor, and indicate, in each case, the chapter which the Act or Resolve makes in the official code for the year 1854. The date enclosed in brackets, after the title, is the time of the approval by the Governor.

The letter [P], placed at the end of the abstract of an Act, shows that it is to take effect from and after its *passage*, which is considered as contemporaneous with its approval by the Governor, indicated by the date in brackets, as explained above. All other Acts and Resolves, in accordance with the general provisions of the Revised Statutes, take effect on the thirtieth day after their passage, unless some other time is expressly mentioned—in which case it is here given.

AMENDMENTS TO THE CONSTITUTION.

The following Articles of Amendment to the Constitution of Massachusetts, were agreed to by the Legislature of 1854, and by them referred to the next General Court, as provided in the ninth article of Amendment to the Constitution; and being of general interest to all citizens of this Commonwealth, are published in full.

Article of Amendment.

In all elections of civil officers by the people of this Commonwealth, whose election is provided for by the constitution, the person having the highest number of votes shall be deemed and declared to be elected.

Article of Amendment.

The meeting for the choice of governor, lieutenant-governor, senators and representatives, shall be held on the Tuesday next after the first Monday in November annually; but in case of a failure to elect representatives on that day, a second meeting shall be holden for that purpose on the fourth Monday of the same month of November.

Article of Amendment.

A census of the inhabitants of each city and town, on the first day of May, shall be taken and returned into the office of the sec-

retary of the Commonwealth, on or before the last day of June, in the year one thousand eight hundred and fifty-five, and of every tenth year thereafter. In the census aforesaid, a special enumeration shall be made of the legal voters, and in each city said enumeration shall specify the number of such legal voters aforesaid, residing in each street, court, avenue, and ward of such city. The enumeration aforesaid, shall determine the apportionment of senators and representatives for the term of ten years. The senate shall consist of forty members. The general court shall, at its first session after each next preceding special enumeration, divide the Commonwealth into forty districts, of contiguous territory, each district to contain, as nearly as may be, an equal number of legal voters, according to the enumeration aforesaid: *provided, however,* that no town or ward of a city shall be divided therefor; and such districts shall be formed, as nearly as may be, without uniting two

counties, or parts of two or more counties, into one district. Each district shall elect one senator, who shall have been an inhabitant of this Commonwealth five years at least immediately preceding his election, and at the time of his election, shall be an inhabitant of the district for which he is chosen, and he shall cease to represent such senatorial district when he shall cease to be an inhabitant of the Commonwealth. Not less than sixteen senators shall constitute a quorum for doing business, but a less number may organize temporarily, adjourn from day to day, and compel the attendance of absent members. The house of representatives shall consist of three hundred members, which shall be apportioned by the legislature at its first session after the return of each enumeration, as aforesaid, to the several counties of the Commonwealth equally, as nearly as may be, according to their relative numbers of legal voters, as ascertained by the next preceding special enumeration; and the town of Cohasset, in the county of Norfolk, shall, for this purpose, as well as in the formation of districts as hereinafter provided, be considered a part of the county of Plymouth; and it shall be the duty of the secretary of the Commonwealth to certify, as soon as may be after it is determined by the legislature, the number of representatives to which each county shall be entitled, to the board authorized to divide each county into representative districts. The mayor and aldermen of the city of Boston, the county commissioners of other counties than Suffolk, or in lieu of the county commissioners in each county other than Suffolk, such board of special commissioners in each county, to be elected by the people of the county, or of the towns therein, as may for that purpose be provided by law, shall, on the first Tuesday of August next after each assignment of representatives to each county, assemble at a shire town of their respective counties, and proceed, as soon as may be, to divide the same into representative districts of contiguous territory, so as to apportion the representation assigned to each county equally, as nearly as may be, according to the relative number of legal voters in the several districts of each county; and such districts shall be so formed that no town, or ward of a city shall be divided therefor, nor shall any district be made which shall be entitled to elect more than three representatives. Every representative, for one year at least next preceding his election, shall have been an inhabitant of the district for which he is chosen, and shall cease to represent such district when he shall cease to be an inhabitant of the Commonwealth. The districts in each county shall be numbered by the board creating the same, and a description of each, with the numbers thereof, and the number of legal voters therein, shall be returned by the board to the secretary of the Commonwealth,

to the county treasurer of each county, and to the clerk of every town in each district, to be filed and kept in their respective offices. The manner of calling and conducting the meetings for the choice of representatives, and of ascertaining their election, shall be prescribed by law. Not less than one hundred members of the house of representatives shall constitute a quorum for doing business, but a less number may organize temporarily, adjourn from day to day, and compel the attendance of absent members.

Article of Amendment.

Eight counsellors shall be annually chosen by the inhabitants of this Commonwealth, qualified to vote for governor. The election of counsellors shall be determined by the same rule that is required in the election of governor. The legislature, at its first session after this amendment shall have been adopted, and at its first session after the next State census shall have been taken, and at its first session after each decennial State census thereafter, shall divide the Commonwealth into eight districts of contiguous territory, each containing a number of inhabitants as nearly equal as practicable, without dividing any town or ward of a city, and each entitled to elect one counsellor: *provided, however*, that if, at any time, the constitution shall provide for the division of the Commonwealth into forty senatorial districts, then the legislature shall so arrange the counsellor districts that each district shall consist of five contiguous senatorial districts, as they shall be from time to time, established by the legislature. No person shall be eligible to the office of counsellor, who has not been an inhabitant of the Commonwealth for the term of five years immediately preceding his election. The day and manner of the election, the return of the votes, and the declaration of the said elections, shall be the same as are required in the election of governor. Whenever there shall be a failure to elect the full number of counsellors, the vacancies shall be filled in the same manner as is required for filling vacancies in the senate; and vacancies occasioned by death, removal from the State, or otherwise, shall be filled in like manner, as soon as may be, after such vacancies shall have happened. And that there may be no delay in the organization of the government on the first Wednesday of January, the governor, with at least five counsellors, for the time being, shall, as soon as may be, examine the returned copies of the records for the election of governor, lieutenant-governor, and counsellors; and ten days before the said first Wednesday in January, he shall issue his summons to such persons as appear to be chosen, to attend on that day to be qualified accordingly; and the secretary shall lay the returns before the senate and house of representatives on the said

first Wednesday in January, to be by them examined; and in case of the election of either of said officers, the choice shall be by them declared and published; but in case there shall be no election of either of said officers, the legislature shall proceed to fill such vacancies in the manner provided in the constitution for the choice of such officers.

Article of Amendment.

The secretary, treasurer and receiver-general, auditor, and attorney-general, shall be chosen annually, on the day in November prescribed for the choice of governor; and each person then chosen as such, duly qualified in other respects, shall hold his office for the term of one year from the third Wednesday in January next thereafter, and until another is chosen and qualified in his stead. The qualification of the voters; the manner of the election, the return of the votes, and the declaration of the election, shall be such as are required in the election of governor. In case of a failure to elect either of said officers on the day in November aforesaid, or in case of the decease in the mean time, of the person elected as such, such officer shall be chosen on or before the third Wednesday in January next thereafter, from the two persons who had the highest number of votes for said offices on the day in November aforesaid, by joint ballot of the senators and representatives in one room; and in case the office of secretary, or treasurer and receiver-general, or auditor, or attorney-general, shall become vacant from any cause during an annual or special session of the general court, such vacancy shall, in like manner, be filled by choice from the people at large; but if such vacancy shall occur at any other time, it shall be supplied by the

governor by appointment, with the advice and consent of the council. The person so chosen, or appointed, duly qualified in other respects shall hold his office until his successor is chosen and duly qualified in his stead. In case any person chosen or appointed to either of the offices aforesaid, shall neglect, for the space of ten days after he could otherwise enter upon his duties, to qualify himself in all respects to enter upon the discharge of such duties, the office to which he has been elected or appointed shall be deemed vacant. No person shall be eligible to either of said offices, unless he shall have been an inhabitant of this Commonwealth five years next preceding his election or appointment.

Article of Amendment.

All moneys raised by taxation in the towns and cities, for the support of public schools, and all moneys which may be appropriated by the State, for the support of common schools, shall be applied to, and expended in, no other schools than those which are conducted according to law, under the order and superintendence of the authorities of the town or city in which the money is to be expended; and such moneys shall never be appropriated to any religious sect, for the maintenance, exclusively, of its own schools.

Article of Amendment.

The legislature shall prescribe, by general law, for the election of sheriffs, registers of probate, commissioners of insolvency, and clerks of the courts, by the people of the several counties, and that district-attorneys shall be chosen by the people of the several districts for such term of office as the legislature shall prescribe.

Senators.—Succeeding as I do the many eminent gentlemen of legal and legislative attainments who have heretofore filled the office to which I am now elected, I may well mistrust my own ability to discharge, in a satisfactory manner, the duties which will devolve upon the Chair. Encouraged, however, by your confidence, to believe that I shall receive your coöperation in my endeavors, and your indulgence for whatever may appear my deficiencies, I shall enter upon the duties with a determined purpose to exert my best efforts to sustain your confidence by acts of strict impartiality and devotedness to the business which may from time to time come before the Senate.

In accepting as I now do this distinguished honor which you have conferred upon me, I tender you my sincere acknowledgments, hoping and believing that our intercourse as Senators may be characterized by a spirit of mutual forbearance and friendly feeling, that at the close of our official labors our reflections may be of the most pleasant nature.

I can merely thank you. I can promise you only my best efforts to perform the duties of the place, and so long as you discover that I am endeavoring to perform its duties with propriety and impartiality, I know, gentlemen, that I shall have the support and the co-operation of

every member of the House, and that we shall all of us endeavor to transact the business we were sent here to perform, so that we may discharge ourselves of the responsibilities of our present offices at the earliest possible moment, keeping in view, at the same time, a due regard to the proprieties of the place and the freedom of discussion.

I, Emory Washburn, do solemnly swear that I will support the Constitution of the United States. So help me God.

The Governor then subscribed to the same oaths—and immediately the salute was heard from the cannon on the Common.

Hon. EPHRAIM M. WRIGHT, Secretary of the Commonwealth, then made the following proclamation:—

Whereas the Honorable Emory Washburn has been chosen, according to the provisions of the Constitution, Governor of the Commonwealth of Massachusetts, and has this day in presence of the Senate and House of Representatives, in Convention assembled, taken and subscribed to the oaths of office:—

I do now therefore make proclamation that his Excellency Emory Washburn is Governor and Commander-in-chief of the Commonwealth of Massachusetts for the current political year—to the end that all persons, and especially all officers, civil and military, may take notice thereof and govern themselves accordingly. God save the Commonwealth of Massachusetts!

The oaths of office were then administered in the same form to Hon. William C. Plunkett, as Lieutenant Governor, and the Secretary made a similar proclamation.

The Governor then proceeded to deliver his address.

PLURALITY ELECTION OF STATE REPRESENTATIVES.

The Committee on the Judiciary, to which was referred an order to consider the expediency of providing for the election of representatives by plurality, reported Jan. 21, that the Constitution does not permit the measure, and therefore it is inexpedient to legislate on the subject. Jan. 24, the report was taken from the table and accepted.

PETITIONS, ETC., OUT OF ORDER.

Jan. 25.—Several members sent up to the Speaker petitions, reports, &c., to be presented after the expiration of the morning hour.

Mr. RICH, of Boston, called attention to the 49th rule of the House, and pointed out the importance of a strict and literal compliance with its provisions. The rule is as follows:

All reports, petitions, memorials, remonstrances, and papers of a like nature, shall be presented during the *first hour* of each session of the House, and at *no other time*, except by special leave of the House.

BOARD OF EDUCATION REPORT.

Feb. 4.—A message was received from his Excellency the Governor, enclosing the an-

nual report of the Board of Education, and of the Secretary of the Board.

ELECTIONS OF ALL CIVIL OFFICERS BY PLURALITY OF VOTES.

Feb. 4.—In the House the resolve for amending the Constitution in relation to elections by a plurality of votes came down from the Senate, and was read twice and ordered to a third reading.

Feb. 7.—The vote was taken upon the resolve as follows: yeas 226, nays 46, total 272; two-thirds of which is 182; and accordingly the House agreed to the amendment by 44 votes more than the number necessary: the amendment will be entered upon the journal, and referred to the next legislature and published.

CHANGE IN DAY OF ELECTION.

Feb. 4.—The consideration of the orders of the day having been resumed, the last matter in the calendar was the amendment of the Constitution, changing the day of the annual election of State Officers so as to coincide with the quadrennial presidential election.

The Speaker announced the question to be—Will the House agree to the following amendment to the Constitution, viz.:

Article of Amendment.

The meeting for the choice of Governor, Lieutenant Governor, Senators and Representatives, shall be held on the Tuesday next after the first Monday in November annually; but in case of a failure to elect Representatives on that day, a second meeting shall be holden for that purpose on the fourth Monday of the same month of November.

And the question was taken by yeas and nays.

When the reading of the names was finished, the vote stood, yeas 181, nays 86. Messrs. JOSSELYN, of Duxbury, HAWKES, of Saugus, and BEMIS, of Pembroke, severally asked and obtained leave to change their votes from *yes* to *no*. Accordingly the vote was announced:—

Yeas, 178; nays, 89; total 267, two-thirds of which is 178. The House accordingly agrees to the amendment by *precisely* the vote required by the Constitution, and it will be entered upon the journal, referred to the next legislature, and published.

URSULINE CONVENT INDEMNITY.

Feb. 4.—An order was presented of inquiry into the expediency of indemnifying the losers by the destruction of the Ursuline Convent at Charlestown, which was negatived, 58 to 99.

Feb. 6, it was moved to reconsider the vote by which the House negatived the order, and Feb. 7, it prevailed without a count, and the order was adopted. [Such orders, contemplating

a mere inquiry into the expediency of a proposition are usually adopted as a matter of course.] Upon final action, indemnity was refused.

STATE DIRECTORS OF WESTERN RAILROAD.

Feb. 10.—In a Convention of the two Houses, the result of the balloting for two Directors on the part of the State in the Western Railroad Corporation was as follows:—

And Messrs. Plunkett and Crocker were accordingly declared elected.	

STATE AUDITOR.

The result of the balloting for STATE AUDITOR of Accounts was as follows:—

And Mr. Wilder was accordingly declared elected.

Feb. 28.—In the House a message was received from His Excellency the Governor, transmitting a communication from the Secretary of the Smithsonian Institution, which was laid upon the table and ordered to be printed.

ELECTION OF COUNSELLORS BY THE PEOPLE.

Feb. 28.—The House proceeded to the consideration of the orders of the day, the first matter being, the Article of Amendment to the Constitution providing for the election of Counsellors by the people. It was moved to strike out the amendment to the article adopted at the last stage, providing for the election from and in single districts, instead of by general ticket. The yeas and nays were ordered upon this motion. After debate, moved

to recommit the article to the Committee which reported it.

Mr. Russell, of Boston, moved the previous question, which was sustained, cutting off the motion to recommit.

The question was then taken upon Mr. Wells's motion, which was lost. Yeas 114; nays 147.

The question then recurred on the article of amendment, as amended, the question being, "Will the House agree to the amendment?" and the vote being taken by yeas and nays as required by the Constitution, resulted as follows. Yeas 177, nays 83, total 260; of which 174 would be two-thirds, and consequently the Article of Amendment is adopted by three more than the necessary number of votes. It will be returned to the Senate for the action of that body on the amendment adopted by the House.

The Article of Amendment in its present form provides for the election, by the people, of a Council of eight members from eight districts, one being chosen from, in, and by each district.

THE LIQUOR BILL.

In the House, March 9, Bill to repeal the Act of 1852, relating to the manufacture and sale of spirituous and intoxicating liquors was taken up. It was moved that the special assignment be laid upon the table, and that the amendment be printed. Lost, 97 to 137. A postponement was moved, when a motion to adjourn was lost. The previous question was then moved and sustained, and the roll was called upon the repealing bill with the following result: Yeas 80, nays 183 — and the bill was refused a third reading. An act was afterwards passed relating to the duties of sheriffs in regard to the sale of spirituous liquors. See Act 400.

TAXES IN BOSTON.

April 25.—A motion to take from the table the Senate bill to change the time of assessing taxes in the city of Boston, was lost, 42 to 85.

CHANGE OF NAMES.

The number of persons, the change of whose names is recorded in the book of "Acts and Resolves," for 1854, is 44, the same number changed in 1853. These changes of name were made by the judges of probate, under the provisions of the statute of 1851, chapter 256. No returns were made in 1854 from Berkshire, Franklin, Nantucket, and Dukes counties. No returns have been made, under this Act, from the county of Suffolk.

MASSACHUSETTS REGISTER.

As usual it was ordered to furnish each member of the Senate and House of Representatives with a copy of this work.

April 28, the bill to establish the county of Webster came back from the Senate, the House amendments not agreed to. The House voted to insist upon its amendments. Subsequently the bill was lost.

HOOSAC TUNNEL LOAN.

A loan of \$2,000,000 on the State credit was authorized, for the construction of the Hoosac Tunnel. See Act 226.

BIOGRAPHICAL STATISTICS.

Mr. Alexis Poole, the door-keeper of the House of Representatives, published during the last session, the eighth number of his annual Register of the Executive and Legislative Departments of the government of Massachusetts, showing the names, date and place of birth, and place of residence of all the officers of the government, including the members of the two houses of the legislature, with the date of their first service in the legislature.

At the head of the list stands of course, His Excellency the Governor, Emory Washburn, who was born at Leicester, on the fourteenth of February, 1800, and whose life may thus this day be measured in even years. His first legislative year was 1825. The Lieutenant Governor was born at Lenox, Oct. 23, 1799; his first legislative year was 1841.

It is worthy of note that a great number of the places of residence are different from the places of birth. Of the Boston delegation, consisting of five members in the Senate, but one was born in Boston; and of the Boston delegation in the House, consisting of forty-four members, but eight were born in Boston; seven were born in the State of New Hampshire, four in the State of Maine, one in England, and twenty-four out of Boston, in various parts of Massachusetts.

The oldest member of the House appears to be Mr. Benjamin Allen, representative from

Ashby, who was born in Lincoln, Nov. 4, 1777; he is a farmer, and this is his first year in the legislature.

We subjoin the recapitulation of the occupations and places of birth of the members of the legislature. The Senate has 40 members and the House 310; but three members of the House are not included in the count:—

Farmers, 109; Lawyers, 46; Merchants, 46; Manufacturers, 23; Builders, 16; Master Mariners, 11; Machinists and Mechanics, 10; Physicians, 9; Boot and Shoe Manufacturers, 8; Clergymen, 6; Cashiers, 5; Tanners, 5; Shipwrights, 4;—298. Gentlemen, Printers, Blacksmiths, Lumber Dealers, Cabinet Manufacturers, and Teachers, 3 each;—18. Millers, Civil Engineers, Booksellers, Real Estate Dealers, and Tailors, 2 each;—10. MASSACHUSETTS MILITIA.

[Corrected in November, 1854.]

The Militia of Massachusetts is divided into two classes, the active and enrolled; the latter consists of all "able-bodied white male citizens of the age of eighteen years, and under that of forty-five, excepting persons enlisted into volunteer companies, and persons exempted by law, or incapacitated by physical and other causes." [See sec. 5, Militia Law.] The whole number enrolled in 1854, as appears from the Returns of Assessors of cities and towns, (whose duty it is to make such returns), is 135,243, being an increase of 1,912 over last year.

The Active Militia consists of Volunteers, who are paid a per diem allowance when on duty, amounting, in the whole, to \$9 per annum, each man of the Artillery and Infantry, and \$18 each for Cavalry. They consist, by the Returns of 1854, of about 7000 men. These are organized into three Divisions and six Brigades, embracing two Divisionary Corps of Cadets, one Company of Light Artillery, five Companies of Cavalry, four Regiments, and four Companies "annexed" of Artillery, and ten Regiments and two Battalions of Light Infantry, and two Battalions of Riflemen.

BANKS.

On the 1st of January, 1854, there were in Massachusetts, 152 banks, with an authorized capital of about \$53,500,000. Of these, 37 were in Boston, having about \$31,500,000 capital, and 115 in other parts of the State, with a capital of nearly \$22,000,000.

During the session of 1854, the Legislature granted an increase of capital to 12 Boston banks, amounting to \$2,800,000, and to 24 other banks, amounting to \$1,840,000.

They also chartered one bank in Boston, with a capital of \$400,000, and 19 in other parts of the State, with an aggregate capital of \$2,100,000.

Since that time, one bank, the Cochituate, in Boston, has failed, leaving the number in Boston the same as before.

From the report of the Secretary of the Commonwealth, it appears that the condition of the Massachusetts banks on the 12th August, 1854, was, as follows:

Due from 153 banks that were then in operation; capital stock paid in, \$54,492,660; bills in circulation, \$24,803,758; net profits on hand, \$6,335,030.13; balances due to other banks, \$6,930,098.95; cash deposited, including all sums whatsoever due from the banks not bearing interest, their bills in circulation, profits and balances due to other banks excepted, \$18,783,281.11; cash deposited, bearing interest, \$563,313.96.

The resources of the same 153 banks were: specie in their banking-houses, \$3,828,402.88; real estate, \$1,186,509.15; bills of other banks in New England, \$5,325,594.79; balances due from other banks, \$8,225,682.30; debts due, including notes, bills of exchange, and all stocks and funded debts of every description, excepting the balances due from other banks, \$93,341,953.28.

The amount of the semiannual dividends paid in April, 1854, was \$2,114,627, and the amount of reserved profits on hand at that time, was \$3,954,335.19.

This old and well-known Company (with the accumulations to the Annuity Fund rapidly increasing, and made by charter entirely independent of the Fire Department) continues to issue Policies on the Joint Stock plan only. The reduction in the rate charged by the Mutuals is a material one, and the insured is not subject to those uncertain and vexations contingencies which are inseparable from many companies.

RAILROADS.

Previous to January 1, 1854, there had been Acts of Incorporation granted to sixty three Railroads in Massachusetts, with an aggregate capital of about sixty millions of dollars. Sixty-two of these roads were in operation, and their construction had cost over sixty-one millions. They had an aggregate length of track of fourteen hundred miles; of double track, three hundred miles; and of branches, over one hundred miles. The greatest speed adopted by passenger trains on any of these roads was thirty miles per hour, but the usual speed was about twenty-three miles. The total expense of working these roads for the year 1853 was some five millions of dollars; their net earnings for the same time, three and one-half millions; and amount of dividends declared, two and one-half millions.

One hundred and two persons were injured by accidents; sixty-four fatally.

At the session of the General Court in 1854, seven other railroads were incorporated, their authorized capitals amounting to nearly one million dollars. An Act was passed authorizing a loan of the State credit, to the amount of two million dollars, to enable the Troy and Greenfield Railroad Company to construct the Hoosac Tunnel. By another Act, the Old Colony and Fall River Railroads were granted leave to unite, which they have since done. For other legislation in 1854 with regard to Railroads, see abstract of No. 2 on page 17 of this book, No. 23 on page 19, No. 286 on page 29, No. 354 on page 32, No. 378 on page 32, No. 417 on page 34, No. 423 on page 34, and Resolve 82 on page 37.

EDUCATION IN MASSACHUSETTS.

PREPARED BY WILLIAM L. GAGE, PRINCIPAL OF THE TAUNTON HIGH SCHOOL.

The importance of a system of public instruction in raising up men capable of governing themselves and others, early forced itself upon the minds of our Puritan forefathers.

When the church was finished, the school-house was begun; and by this prompt commencement, and steady sustaining of the same alacrity, education has become what it is in Massachusetts, and our system of public schools the pet of the Commonwealth. Our State has become in this matter the guiding star of our Republic; from it streams forth a light which is seen North and South, East and West, and which does much to enlighten the nation.

Massachusetts claims great excellence for her schools. The people are interested in them, and in the working of our school system. The teachers are generally of a high order of men and women, in mind, in character, and in intelligence. The scholars are stimulated to learn by the general diffusion of information around them, and they readily see that the pursuits of the school-room have a direct and important bearing on practical life. The houses are spacious, commodious, and in some cases elegant.

To the introduction of the graded system in our leading towns, and to the efficient organization which our cities have adopted, is owing in a great degree the excellence of our schools. This system is of recent introduction among us, but even now it has greatly modified former educational institutions.

By the continued appeals of Hon. Horace Mann, and by his unfailing energy as Secretary of the Board of Education, the graded system was introduced amongst us, and his efforts have been zealously seconded by his able successor. This system has to a great extent succeeded in undermining the Academies, substituting the more unpretending but not less effective High Schools in their stead, and introducing a system of rudimentary instruction far more thorough than that formerly in vogue. In our leading cities, the system seems to have reached a degree of real excellence. In these, we have the following gradations; the Alphabet School, the Primary, Intermediate, Grammar and High School. Here the time can be passed from infancy to early manhood and womanhood, and here can all those studies be pursued in their due order, and with due care, which are to fit the child for life.

In some of our large towns the graded system has not been adopted in its most elaborated form. In most of these, the High School has been established; and its numbers are supplied from the district schools. In all, however, the tendency is towards a thorough grade; and this desirable end will be attained by the most of our large towns and cities in a few years. By the politeness of Rev. Dr. Sears, the Secretary of the Board of Education, we are enabled to present to our readers the names of the towns in Massachusetts which sustain High Schools. They are the following:

Abington,	Dorchester,	Medford,	W. Roxbury,
Amherst,	Fairhaven,	Medway,	Salem,
Attleboro',	Fall River,	Milford,	Somerville,
Barre,	Fitchburg,	Millbury,	Southwick,
Bedford,	Framingham,	N. Adams,	Springfield,
Bolton,	Gloucester,	Nantucket,	S. Reading,
Boston,	Grafton,	Natick,	Stoneham,
Brighton,	Haverhill,	New Bedford,	Stowe,
Brookline,	Ipswich,	Newburyport,	Taunton,
Cambridge,	Lawrence,	Newton,	Waltham,
Charlestown,	Lee,	Northborough,	Winchester,
Chelsea,	Leominster,	Northampton,	Woburn,
Chicopee,	Lowell,	Palmer,	Worcester,
Clinton,	Lynn,	Pittsfield,	Ware,
Concord,	Manchester,	Plymouth,	W. Hampton.
Danvers,	Marblehead,	Quincy,	
Dedham,	Marlborough,	Roxbury,	

Boston, which bears off the palm of enterprise, maintains the supremacy in education also. Her great advantages for a thorough classification of pupils, her high appreciation of the value of educated labor, and her consequent efforts to engage teachers of tried

ability, give her a position in this respect, far higher than that of any other place in New England. And the influence of Boston over education is very great. An intelligent teacher remarked to us not long since, that every three hundred dollars added to the salaries of Boston teachers, adds one hundred to those of the teachers of New Hampshire. Indeed, as Cuvier could fix the class of any animals by simply noting the form of one of its teeth, so would one be able to state with considerable accuracy the distance of the larger towns and cities from Boston by ascertaining the amount of their teachers' compensation. In Boston the salaries of teachers are not meagre, nor insufficient for the needs of life. Boston has tried the experiment of paying for her instructors salaries which are not out of proportion to those which men of trained minds and administrative capacity receive in other departments. The experiment has proved eminently successful; and to the fact that her teachers are many of them men of energy and capacity, with here and there a scholar, is the excellence of the Boston schools much indebted.

But we yet think that an unfair comparison is often made between Boston teachers and those of the neighboring cities and towns. The unrivalled organization of schools in the metropolis gives to instructors there an advantage which cannot be too highly rated; while the general intelligence which pervades it gives even the scholars in the schools a bias towards the rapid acquisition of knowledge. We do not make these remarks with any desire to detract from the excellence of our Boston teachers; but in this matter men are in danger of awarding that praise to individuals which rightly belongs to a system.

The salaries of teachers in this State are neither insignificantly small nor attractively great. In nearly every town the competent teacher may live in a moderate but comfortable style of life, yet nowhere can he by public instruction, amass wealth. In Boston, even, where the salaries of the higher masters seem princely compared with the wages which the rural districts reluctantly give, they not unfrequently abandon their profession to adventure upon the more rapid acquisition of wealth. The teachers of the State, however, with individual exceptions, do not merit large salaries by reason of superior education. In this regard, they fall behind their brethren of the clerical, legal and medical professions. What is requisite in a teacher is administrative capacity; if conjoined with learning, well; but if without this foil, its absence is not much desiderated.

From the last report of the Secretary of the Board of Education in this State, we learn that the average salary paid to High School teachers is \$864. This sum contrasts favorably with the salaries of clergymen, the average of which is much lower. But the expense of an education which enables a man to enter upon the imparting of knowledge, in these schools, the peculiar bent of mind which is found in the successful teacher, together with the wearing nature of his employment, render this apportionment of wages just. In this last regard, Mr. Wright, the Secretary of State in this Commonwealth, has presented some novel statistics. By his returns, the average length of a clergyman's life is fifty-six years, while that of the teacher is but a little more than thirty. Indeed, there is but one employment specified, if we remember correctly, which is more adverse to longevity than that of a teacher. In this view, the comparatively high salaries of the masters of our High Schools are abundantly justified.

We learn also from Dr. Sears's report, that the average of monthly wages given to the male teachers of district schools in the State, is thirty-seven dollars, and that of female teachers, fifteen. This sum includes the allowance for board. We do not think that this hard-working class of our community receive adequate compensation. The district school teachers in the State embrace men and women of more real purity, perhaps, than is to be found in any other class, with the exception of the clergy. The amount of learning which is required in them is very trifling; yet a clear head and a willing heart are indispensable, and these deserve their reward.

The amount of money paid by the towns of this Commonwealth for the instruction of each of its children differs widely in one district from another. The suburbs of Boston take the lead, while the small towns on Cape Cod bring up the rear. To Brookline belongs the especial honor of heading the list; Winchester and West Roxbury follow. The amount paid by the town of Brookline for the instruction of each pupil in its public schools between the ages of five and fifteen years, is upwards of ten dollars annually; in Truro, Dennis, and the more backward towns of the State, the amount does not vary far from one dollar and fifty cents.

The number of incorporated Academies is at the present time identical with the number of public High Schools. But the inherent faults of these institutions, composed as they are, of a continually fluctuating set of pupils, and relying for their support on the popularity of the instructor, are continually reducing the number. Our High Schools, on the contrary, are continually gaining in number and in efficiency. The men who direct them stand in the front rank of teachers, being generally young men of trained minds and of some accomplishments; and the continually advancing rates of salary will tend to retain these in their posts of usefulness and honor. The private schools of Boston and our larger towns and cities have always been in great repute, and justly, as we think. They have maintained their rank because they have usually taken to themselves those children who enjoy the advantage of home training. But now that our Public Schools are taking so high a position, there is no reason that parents should withhold their children from them. When the public schools are the resort solely of the children of uneducated foreigners or of unworthy parents, then there may be an excuse to the careful father and mother for withdrawing the child of their love from temptation and from vice; but when our schools become mixed in character, when there is infused into them much of good, the parent who is true to all his trust, will send his son or daughter there, and strive to turn the wavering scale.

The number of Private Schools in the State is large, being no less than seven hundred and twenty-three, and the number of pupils in them is upwards of eighteen thousand. Their decrease is to be a matter of time; their entire extinction is not a matter of certainty, but the principle on which they rest is not an American principle, and therefore cannot well thrive among us. The teachers which they enlist are often men of fine culture, and not unfrequently friends of general education, yet we cannot but think that they are often tempted to injure the cause of public instruction, and regret that they drew off some of the best blood of our schools.

One of the characteristic features of the educational system of Massachusetts, is the associations of teachers for the purpose of mutual improvement and encouragement. The American Institute of Instruction, although nominally a national thing, was founded in great part by Massachusetts teachers, and owes its prosperity and the interest of its meetings, in great measure, to the efficient aid which men from our own Commonwealth give. We do not make these remarks with any intention to decry any other State, but the fact is unquestionably true. In other New England States the positions are very few which have sufficient attraction to retain a teacher but a small number of years, and these are not in the domain of public instruction. We are not to look for this state of things to continue. Some of our best teachers have lately removed to other States, and Rhode Island and Connecticut eminently are enjoying their services. But at present, Massachusetts is compelled to take the control to a good extent of this Association; thirty-nine of the sixty-three officers are Massachusetts men; and our own State is the only one which has ever appropriated a dollar to aid in its establishment. Its infancy has passed, however, and it is now in full success. At the late meeting in the city of Providence, more than a thousand teachers were present, and the exercises were of the highest order of excellence.

Next in course is the Massachusetts State Teachers' Association. Its meetings are held annually, in Thanksgiving week, and are not unfrequently of much interest; they bring together the best teachers of the State, and often attract eminent teachers and friends of education from neighboring States. The Massachusetts State Association publish a monthly journal, conducted by tried and accomplished teachers, and offer prizes on subjects connected with education.

Many of the counties also maintain their own Associations, and the meetings of these, although of course small, are often of great interest and profit. Norfolk, Essex, Middlesex, Plymouth, Hampden, Bristol, Barnstable, Nantucket, Dukes, Franklin and Berkshire, have each its association of teachers, to the support of which, the State grants fifty dollars annually. These meetings tend to keep alive an interest in the teacher's duties, and at them are formed and cemented friendships of great strength and endurance. They are to be valued on account of their influence for promoting sociality among teachers, rather than for being the means of imparting useful ideas. Our own estimate of the value of these meetings, whether of the State or County Associations, is so high that we

shall be pardoned for quoting a few words which we employed on another occasion when testifying to their merit.

"At our conventions we assemble as men and women of great diversity in age, acquirements, and ability, but with one common purpose. Old attachments are revived, and new ones formed; some give of the abundance of their thoughts; others receive in their neediness; but all are benefited. We do not plead in behalf of these meetings that many hints are thrown out, or many schemes proposed, which are received or adopted. We know that much which is said on such occasions is lost, simply because so much is said. But a word dropped upon this ear, and a sentence upon that, provoke thought, and thought speedily becomes action. We must not test the usefulness of these meetings by the amount of information gained. We must remember that we assemble to derive food for thought, rather than thought itself; that we assemble to have our energies awakened, our purposes strengthened, and our hold on the blessings of social life confirmed; yet more, that we stand together there as the representatives of Massachusetts schools; to testify to their strength, to their hold upon our affection; to utter words which do not lose their force at the borders of our State, but which loudly ring wherever it is remembered that Massachusetts is the mother of American schools."

We intended to present to our readers some account of the state of education in other sections of New England. This we are compelled to forego. We have already referred to the fact that Massachusetts is the leading State where teaching is adopted to any considerable extent for life. In the other States the teacher's salary is very moderate; indeed there is scarcely a teacher in New Hampshire with whom the Principal of a good Massachusetts High School would be willing to exchange situation. Of Vermont, nearly the same thing could be said. But into these and other States, Massachusetts is infusing a portion of her own life, and the result is beginning to be manifest. Our State has been and is the "schoolmaster" to our sister States. We do not wish to boast of undue superiority. We are fully aware that the praise of excellence is to be awarded to but few of our schools, and to our system in theory rather than in practice; still we would not be unmindful of what the great pervading spirit with regard to educated labor has effected, and that that feeling has gone forth from our own Massachusetts.

This School is kept in the building, lately occupied by the State Normal School, situated in the pleasant and healthful village of West Newton, Mass., on the line of the Boston and Worcester Railroad, nine miles from Boston, and about two minutes' walk from the station.

It is intended that the course of studies shall embrace every branch of a thorough English and Classical education, as well as Modern Languages; and while particular attention is given to preparation for College, or for Mercantile and Scientific pursuits, the highest aim of the teachers will be to impart instruction in the common branches thoroughly and correctly.

A primary department will be connected with the institution, into which pupils of the youngest school-age will be received. Partic-

ular attention will be given to the subject of manners and morals.

For further particulars address N. T. Allen, West Newton, Mass.

AMERICAN ANTIQUARIAN SOCIETY, WORCESTER.

Incorporated 1812. The American Antiquarian Society, established for the purpose of collecting and preserving the materials of history, more especially *American History*, was incorporated by the Legislature of Massachusetts, in 1812.

Isaiah Thomas, the distinguished Printer and Publisher, and author of "The History of Printing in America," was the first President, and has been the greatest benefactor of this institution. A brick edifice for the Library and Cabinet, erected at his expense, was completed in 1820. His private collection of books, which was a very considerable one, became the basis of the Library. Extensive additions were made to the building after his death, from resources provided by his will;

and the principal portion of the funds of the Society, now amounting to more than \$27,000, resulted from his bequests.

The Library of the Society now exceeds 16,000 volumes. Its cabinet contains many articles of curiosity and interest; and its manuscripts, coins, &c., are of considerable value. Two volumes of Transactions, and a catalogue of the Library, have been published; and a third volume of Transactions is in preparation for the press.

There are two meetings of the Society in the year; one at Worcester, on the 21st day of October, in commemoration of the discovery of America by Columbus, the other in Boston, on the last Wednesday of each month, at the Antiquarian Hall, in Worcester.

This institution originated in a conviction that the interests of Congregationalism, and of Christianity in general, would be advanced by collecting into one accessible place whatever printed or manuscript memorials of the New England Fathers are yet extant, and also such documents of the present age as will be of historical value in the ages to come. It was organized in Boston on the 12th of February, 1851. The enterprise, however, was conducted on a comparatively small scale, till, by a re-organization in May, 1853, its privileges were extended to the whole body of Evangelical Congregationalists throughout the continent, and their co-operation invited.

Its chief design, in the words of the constitution, is "to found and perpetuate a Library of books, pamphlets and manuscripts, and a collection of portraits, and whatever else shall serve to illustrate Puritan history and promote the general interests of Congregationalism;" as also "to secure the erection of a suitable building for its Library, its meetings, and the general purposes of the body. The terms of membership are one dollar only,—with the reasonable expectation that each member will interest himself in preserving from destruction and transmitting to the Library such documents, bearing on the general objects of the Association, as may come in his way.

The By-Laws provide for "a sermon, oration, or address" at each anniversary, "on the Tuesday preceding the 4th Wednesday in May,"—to be followed the next day by "a collation, accompanied by such exercises as the directors may prescribe." There are also three other meetings of the body each year, viz.:—"on the last Tuesday of August, November and February." The Directors meet monthly, and report annually.

No book, pamphlet or periodical can be taken from the Library; but the room is open to the members at all hours during the day—Sundays excepted—for reading, reference and consultation, and a Librarian is ever on hand to assist their inquiries.

Since the organization in May, 1853, about 1000 members have enrolled their names, residents in all parts of the continent where Congregational churches are found, from Califor-

nia to Canada. The shelves of the Library already contain about 3,500 volumes and more than 10,000 pamphlets, including deposits made by the American Statistical Association, and a few private individuals, besides many duplicate numbers and incomplete sets of old periodicals, and an assortment of the current dailies, weeklies and monthlies. The manuscript department, though not large, contains some rare specimens; and portraits of the Fathers are beginning to adorn the walls of the Library.

They will also be able to consult and read at *all* times any book in the Reference Library; and, at such times as it may not be in home use, any book in the Circulating Library. The Library is open for the circulation of books, from 3 to 8 o'clock, P. M., and freely affords its treasures for home use under certificates applicable to each case, to past and present members of the City Council; to office holders under the City Government and all persons regularly employed by the City; to all officiating ministers of the Gospel, teachers of Private Schools and members of the Normal School; to all medal scholars, and an equal number of pupils proficient in their studies graduating with them from the Public Schools; and to all the inhabitants of Boston over the age of twenty-one years, who are known to the Librarian to be persons who ought to enjoy the privileges of the Library. These treasures are also accessible to all non-resident donors of one hundred dollars or an equivalent; to all who deposit the value of a book or set of books, for the time being; and

to all, finally, who bring a certificate from a responsible citizen, who thereby makes himself liable for loss and injury.

The second annual report of the Trustees, dated Nov. 3, 1854, gives the following information:—

“If we are authorized to form an opinion of the future growth of the library from the experience of the past, we may safely calculate upon an increase hereafter of at least six thousand volumes annually, exclusive of pamphlets; a rate of increase which in fourteen years will carry the library up to 100,000 volumes,—a larger collection than any at present existing in the United States.”

The number of volumes at present in the library, is 16,221, besides 2,989 tracts added this year, and nearly a thousand given earlier. In November, 1853, the number was 9,688. There are of many works quite a number of duplicates, but still the supply falls short of the demand, and a great many persons cannot obtain the book they want at the time they ask for it; and of many books desired, no copy at all has yet been bought, for want of funds; and it is confidently believed that when this fact is made known, many persons who have books lying idle in their houses, because they have ceased to be interesting to their families, will gladly add them to the Public Library, where they will again become useful.

For the first five months and a half of its existence, ending Oct. 17, 1854, “six thousand five hundred and ninety persons entered their names in order to enjoy its privileges; the number of volumes borrowed for home use was thirty-five thousand three hundred and eighty-nine, besides several thousands used in the reading room, of which no record is kept.”

In December, 1854, the following gentlemen were appointed to superintend the erection of a building for the Library:—Robert C. Winthrop, Samuel G. Ward, from Citizens at Large. George Ticknor, Nathaniel B. Shurtleff, from Trustees of Public Library. Geo. Odiorne, from Board of Aldermen, George W. Warren, from Common Council, of 1854.

The New England Female Medical College was opened in 1848. It is conducted and sustained by the Female Medical Education Society, organized in the same year, and incorporated by the Massachusetts Legislature, for the purpose indicated by the name of the Association. The officers of the Society are, of course, the officers of the college.

Above a hundred pupils have been connected with the college since its commencement, and many of them are engaged in an extensive and lucrative practice among females and children.

The term of the New England Female Medical College commences on the first Wednesday of November annually, and continues four months. The course of education is the same as that in male medical colleges, and the requirements for gradation the same.

Professors.—William M. Cornell, M. D., Physiology, Hygiene, and Medical Jurisprudence; Enoch C. Rolfe, M. D., Obstetrics and Diseases of women and children; Stephen Tracy, M. D., Principles and Practice of Medicine; John K. Palmer, M. D., Materia Medica and General Therapeutics; Henry M. Cobb, M. D., Anatomy and Surgery. William Symington Brown, Chemistry.

Gentlemen and ladies become members of the Society by the payment of one dollar annually, and life-members by the payment of twenty dollars, at one time or in several payments. It is optional with the annual members to continue one year or more. The Society has a hundred and fifty life-members, and some five thousand have paid the fee of annual membership for one year or more.

The Society has above a thousand dollars worth of apparatus, — two dissecting manikins,

and a variety of other articles imported from Paris; also anatomical preparations, drawings, &c. The members have access to the rooms, and are entitled to copies of the Society's annual report.

Free Scholarships. — The Legislature, at its session of 1854, appropriated a thousand dollars a year for five years, to pay the tuition of forty pupils in the College annually; the beneficiaries to be selected from the best qualified applicants from the different counties, according to the senatorial apportionment to the several counties or districts. Application can be made to the Secretary.

Though indirectly somewhat political in its nature, the ORDER is in no sense a partisan organization, but aims to preserve and perpetuate those institutions which have resulted from our revolutionary struggle.

Annual meeting of the Society on the 2d Thursday in May.

According to the last annual report of this Society's operations, there have been 82 new societies formed, principally in the Southern and Western States, making the whole number of societies auxiliary to the Parent Society about 3,000.

Ninety-eight Life Directors, and 1774 Life Members, have been added to the Society during the year, being an increase over the number made previous year, of thirty-one Life Directors, and of 411 Life Members, which increase bears testimony to the increasing appreciation of this Society.

The receipts of the year amount to \$394,340.50, which is an increase of \$17,798.08 above the amount of last year; the amount received from legacies is \$34,522.24.

The expenditures during the year have been as follows:—

Expenses of Depository and publishing department,	\$303,581.67
Salaries, and expenses of Agents and other officers,	57,497.60
For the circulation of the Bible in foreign lands,	31,424.78
	<hr/>
	\$394,713.55

The number of Bibles printed during the year, of all sizes, and in different languages, is 306,000, and of Testaments 556,000. This makes the total issues since the organization of the Society about one million.

The Bibles and Testaments are distributed in all parts of the world.

At present there are thirty-two Agents employed exclusively by this Society, besides two more employed in conjunction with auxiliary societies. Of these, six were appointed during the year, including one to Oregon Territory. Six of those employed the year before, have resigned.

The number of volumes issued gratuitously during the past year, is 57,520. Besides these, the Society has published, or purchased and circulated gratuitously, in foreign lands, many other thousands. A large number of volumes, moreover, which had been sold, and never paid for, have, during the year, been granted to the parties so indebted.

That the books thus issued have gone to meet a great variety of wants, both at home and abroad, will be seen by a few specimens selected from the different classes of grants.

Soon after the organization of the Society, an effort was made to collect Bibles of different tongues, particularly those of an early date, into a Library. The object was to have the means at hand for comparing one version with another, and thus making them, when preparing new versions, mutual helpers in determining the true meaning of the Inspired Word. For the same purpose, lexicons, grammars, concordances, commentaries, &c., were sought, and many of them furnished as a gratuity.

The Library has grown from year to year, until the number of volumes now amounts to

seventeen thousand. Many of them, it is true, are of comparatively little worth in such a Library, while others have a high value. One Bible in Latin, black letter, with illuminated chapters, was printed in Venice, in 1476, shortly after the art of printing was discovered. Twelve copies are folios and quartos in English, which preceded the version of King James in 1611, and many are of those which immediately succeeded. Specimens, more or less perfect, have then been gathered in nearly all the tongues into which the Scriptures have been translated.

The last report of this Society states that the receipts of the previous year were about \$121,000, and the expenditures over \$130,000. Nine agents have been employed during the year, who have visited and attended over 17,000 churches and public meetings, a larger number than have been visited in any previous year.

Two periodicals have been issued, with a monthly circulation of 42,000 copies. Five missionaries have been appointed during the year.

The number of missions prosecuted under direction of the Board, is twenty-one, embracing eighty-six stations and five hundred and thirty-nine outstations. Connected with the missions are sixty-six missionaries, of whom sixty-one are preachers, and there are sixty-four female assistants. Two missionaries and five female assistants have died, and four missionaries and four female assistants have joined the missions. The number of native preachers and assistants is two hundred and twenty; total of missionaries and assistants connected with the missions, three hundred and forty-nine. Three missionaries are under appointment. There are one hundred and ninety-two churches, having a membership of about 15,219, of whom were added by baptism the past year, 1,820. The number of schools is eighty-eight, including three for native preachers, and fourteen normal and boarding schools, with about 1,992 pupils.

The American Baptist Missionary Union has now 4,853 members, by the payment of one hundred dollars each, the majority of whom are laymen, and of whom full three-fourths were made members by the votes of churches and other religious bodies. The number constituted members within the past year is 667.

The forty-fifth Annual Meeting of this Association occurred in September last. The doings of the Society are in brief as follows:

Forty-one missionaries, thirty-four of whom were for the first time employed, have been sent forth upon foreign missions. Sixteen are now under appointments, and "yet," says the report, "there is not the slightest probability that the supply will equal or even approximate the demand."

Three publications have been, as usual, regularly issued during the year, the monthly circulation of which has been 77,116 copies. Of other works, there have been published 22,150 copies. Eleven Agents have been, and are still employed by the Association; in addition to which much labor has been expended by returned missionaries.

The receipts of the past year, including a small balance on hand at the beginning of the year, have been \$310,107.90, and the expenditures have amounted to \$322,150.39, being over \$12,000 more than the amount of available means of the Board.

The Board have at present under their care twenty-nine missions, with 166 stations and out-stations, at which 404 missionaries and their assistants are employed, besides 268 natives, or a total of 672 laborers.

The whole number of churches connected with the missions is 104, containing 26,526 members. The number of members admitted to all the churches during the year is 2,152.

The number of pages printed during the year is 57,650,750. The number of pupils in all the schools connected with the missions is 23,550, of whom 11,353 are supported at school by the Hawaiian government. The Educational Department consists of nine Seminaries, twenty-three Boarding schools, and six hundred and ninety-seven Free schools, of which three hundred and forty-four are supported by the Hawaiian Government.

D. D., *Directors*. Rev. Increase N. Tarbox, *Sec'y*. Stephen T. Farwell, Esq., *Treasurer*. Hardy Ropes, Esq., *Auditor*.

From the last Report of the Society it appears that the receipts from donations, legacies, &c., have been \$21,366.47, and the disbursements during the year, \$19,673.59.

The Report says, "Notwithstanding the present very prosperous condition of our Treasury, it happened no longer ago than last January, that the Board were compelled to make an appropriation of *fifteen* instead of the usual appropriation of *twenty* dollars, through lack of funds. At the quarterly meeting in April, the Directors were able to make up this deficiency, and yet leave the Treasury in excellent condition. The reason of this sudden change in the state of the Treasury, may be found in the recent receipt of large sums in the form of legacies. This source of income, while it is very important to us, is in its nature very irregular. * * *

"One fact connected with our financial history for the past year, is gratifying. By reference to the more detailed Report of the Treasurer, it will be seen that our income, derived from the contributions of the churches, is decidedly on the increase. We received, during the year, \$10,157.46 from this source alone. The year previous, this part of our income was less than \$9000; and for some years before, it had been less than \$8000.

"Two hundred and ninety-seven young men have received aid during the past year, from the Treasury of the Society, and although the number for the past year falls slightly below what it was the year previous, still the general law is very clearly one of advance, though the progress is altogether too slow. It were greatly to be desired that this number might be largely increased, and that speedily.

"The young men under the care of the Society, continue to make the most commendable exertions to aid themselves in their course of education. The amount returned last year, on the schedules, as having been earned by the beneficiaries, was \$17,638; a sum very nearly the same as that appropriated from our Treasury for their support. This sum does not differ very materially from that returned in some former years, and yet it is steadily on the increase. The same services, especially in the department of School Teaching, are doubtless better rewarded now than they were a few years ago, and this may be sufficient to account for the improvement under this head."

At the last annual meeting of this Society,

held in New York city, May 10, 1854, a report of its doings was presented, from which we gather a few items of information.

The number of ministers in the service of the Society is 1,047, of whom 292 have labored in New England, and the remainder, 214 in the Middle, 11 in the Southern and 530 in the Western States and the Pacific Coast. The aggregate of ministerial labor has been equal to 870 years. Two thousand one hundred and forty-one societies and stations have been supplied with preaching, at stated intervals, by the Society; sixty-five of which have been addressed in foreign languages.

Connected with these societies are 65,400 Sunday School scholars. The additions to the churches have been 6,025; one-half of whom are recent converts. These societies have contributed to benevolent operations, \$30,106.88.

Fifty new churches have been organized; and forty-five have become self-sustaining, and have passed from the list of beneficiaries to that of benefactors, sixty-five houses of worship have been completed, forty-nine repaired or improved, and eighty-eight are in the process of erection.

The receipts of the year have been \$198,411.22, and the expenditures \$184,025.76, leaving a balance in the treasury of \$14,385.45.

Since the establishment of the Society in 1826, 15,706 years of labor have been performed by its missionaries; about \$2,715,000 have been expended, averaging about \$173 for each year of missionary labor. During the whole time, 126,705 persons have been added to the churches under the patronage of the Society.

AMERICAN TRACT SOCIETY, BOSTON.

John Tappan, *Pres.* Rev. Seth Bliss, *Sec.* N. P. Kemp, *Agent and Treas.* Depository, 28 Cornhill.

The operations of this Society, as reported at the last annual meeting held in Boston in May, 1854, are briefly as follows.

Seventy-six new publications have been issued in 7 different languages, making the total number of the Society's publications, 4,912.

Two monthly newspapers have been published in English, with a circulation of 450,000 copies; and one in German, which circulates 25,000 copies. The cost of these three papers has been \$51,693.18, and the entire receipts \$48,042.49, or \$3,650.69 less than the outgoes. The deficiency is owing partly to a rise in the price of paper, the increased circulation of the Messenger gratuitously to missionaries at home and abroad, and to colporteurs and poor families; and to the stock of the Child's Paper retained for future binding.

Twenty-one colporteurs have been employed during the year; the latter of whom have sold about \$12,000 worth of books, and given away over one thousand dollars worth more. They have visited 14,133 families, of which 2422 neglect public worship; 809 were destitute of religious books, except the Bible; and 359 were destitute of the Bible.

This Society confines its labors mostly to the New England States, but is closely connected with the Society whose head quarters are at New York, and which occupies the whole Union as its field of labor. This latter Society employs 619 colporteurs, who have visited during the year 568,032 families; 30,694 of which were destitute of the Bible, and 49,935 of other religious books.

The expenditures for the year have been over \$406,000. A large number of collegiate and theological students engage in this work during their vacations; and afterwards have acknowledged themselves under great obligation to this service, for much of the animation they have been called upon to manifest in the more dignified fields of missionary labor.

THE THURSDAY LECTURE.

This Lecture was commenced by John Cotton, second Pastor of the First Church, in Boston, in 1623, and at first sustained by himself alone. Afterwards, by courtesy, it came to be preached by each of the ministers of the Boston Association in turn. In the year 1845, the Association gave it back into the hands of the Pastor of the First Church, to whom, by right, it still belonged. By his invitation the following gentlemen assist in sustaining the Lecture. It is preached by them in the order of their college graduation, in the Chauncy Place meeting-house on every Thursday at eleven A. M.

By an act of the last Legislature, an important change was made in the Judiciary of this State. The District Courts, which took the place of old Courts of Common Pleas, were abolished, and all their jurisdiction transferred to the Supreme Judicial Court, to which bench

three additional judges were authorized by the above act. The State is now divided into three Judicial Districts, denominated the Western, Middle, and Eastern Districts; and for the purpose of hearing and determining questions of law and equity, the terms are held for these districts, instead of being held as heretofore, in the several counties. These terms are held annually in Portland for the Western, in Augusta for the Middle, and in Bangor for the Eastern District. The other cases are tried, as heretofore, in the several counties where they are commenced.

POPULATION OF NEW ENGLAND.

The Act of Congress under which the United States Census for 1850 was taken, established the rule which was to be adopted for the apportionment of members for the 33d Congress, and until the taking of the next census. That rule limited the number of the members of the House to 233, and provided that the ratio of apportionment should be obtained by dividing the aggregate population of the Union, as ascertained by the new census, after deducting therefrom two-fifths of the whole number of slaves, by 233. The population of each State was then to be divided by the ratio so obtained, and the last quotient would show the number of members to which the State would be entitled, besides which, however, those States to which the largest fractions belonged, after the division, were to be entitled to one additional member, until the whole number of 233 should be made up. This apportionment was made, and the result certified by the Secretary of the Interior.

We give below, according to the United States Census of 1850, the population of the States of Connecticut, Maine, New Hampshire, Rhode Island and Vermont. The population of Massachusetts may be found in the table of Gubernatorial Votes, Population, &c.

A NEW AND VALUABLE INVENTION IN HEATING APPARATUS.

It has long been supposed that a large proportion of the fuel consumed for the general purposes of generating heat has been lost or wasted in passing off into the atmosphere in a crude or unconsumed state, in the form of smoke and gases; but as our ancestors did, so have we *continued* to do,—viz, construct apparatus for merely burning fuel, without consulting the laws of Nature in reference to the application of heat to the heating surface, so as not only to consume the combustible properties in the smoke and gases, but to hold them suspended over the fire to the direct action of the light and rays of heat from the fire-chamber, until the whole fuel consumed is made to impart its heat before it is suffered to escape into the atmosphere.

Mr. Gardner Chilson, of the firm of Chilson, Gould & Co., Nos. 99 & 101 Blackstone street, Boston, has succeeded, after several years' study and experimenting, in producing a new and highly valuable invention for constructing all kinds of heating apparatus, for either steam, hot water, hot air furnaces, stoves, ranges, &c. From many satisfactory experiments, in which his invention has been thoroughly tested, it is fair to conclude, if not promise, that at least a saving of fifty per cent. in fuel over the common mode can be made by it.

This invention was patented by Mr. Chilson in the United States, Sept. 26, 1854; in England, May 26, 1854; and in France, June 14, 1854. It is well known that Mr. Chilson has been a successful inventor for many years, and has done much to improve the mode of heating apparatus for various purposes. Many public and private buildings throughout the country are indebted to Mr. Chilson for a healthful, economical and durable plan for warming and ventilation. A constant personal attention to the subject has crowned his labors with remarkable success. Stimulated by his success he has spared no pains or expense in making further researches into the causes of the consumption of fuel and its effects applicable to heating surfaces; and some five years since he discovered a new principle for burning fuel and generating heat, which will, when fully developed, tend to revolutionize the world in the manufacture of heating apparatus for all general purposes. Although discovered some five years since, yet it was not until quite recently brought to that state of perfection to warrant him in announcing it to the world. The first form or plan of this principle brought out, was what is known as Chilson's Patent Trio, or, as some call it, the "Elephant Stove." We know of no more comprehensive way of describing and explaining this stove, than to copy a notice of the Stove and Portable Furnace constructed on the same principle, published in the Boston Atlas, Dec., 1854.

"ECONOMY IN FUEL.—It has long been the study of the manufacturers of stoves, furnaces and other warming apparatus, how they could turn to the best account the large amount of unconsumed or half consumed fuel, which is known to pass off in the form of smoke and gas, into the smoke pipes. Invention after invention has sought to diminish this waste, and to increase the proportion made available in increased caloric. Among those which have proved to be most successful may be mentioned some of Mr. Chilson's inventions, and among them we would particularly notice the Trio, or so-called Elephant Stove, and also his portable furnaces on the same principle.

We have enjoyed the benefits of one of these stoves in our counting room for two years, but as there are so many new inventions in furnaces and stoves, we have not been in haste to express our opinion, until we could fully test the success of this invention. We can now speak decidedly in its favor, and any one who examines its successful operation at our counting room in State street, will need only his own senses to assure him that we award to it no undeserved approval. We can also speak from experience, with high approval of Mr. Chilson's Trio Portable Furnace, on the same principle. We now have one of these in our dwelling, taking the place of one found insufficient to warm the building, and removed to give place for the Trio. The latter gives entire satisfaction, affording a thoroughly warmed house, which was not the case with the one removed, with the promise of a large saving of fuel.

That it depends entirely on the construction of heating apparatus to secure the greatest possible amount of heat from the fuel consumed, there cannot be a doubt. We have had sufficient experience in this matter in years past, by the use of stoves and furnaces, to satisfy us of the unnecessary waste of fuel. The radiating surface is usually too small, and of such form as to allow the smoke and gases to pass off too quickly unconsumed to the chimney. It is

thus totally lost. This has been caused by the want of a suitable radiating surface, so constructed as to hold the smoke and gases in such a position as to cause them to become highly heated, and thereby thoroughly consumed, and impart their heat before leaving the radiator. Mr. Chilson's invention has succeeded in securing this desirable object, in the saving of fifty per cent. in fuel, and giving us thoroughly warmed rooms, and withal a fresh, healthful warmth.

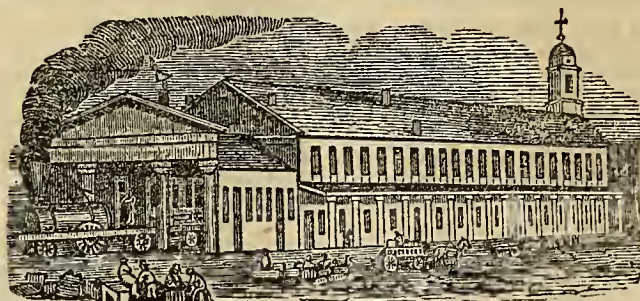

We would describe the form and operation of the stove, say one of the medium size, to be that of a long, tapering trunk or cone, fifteen feet long, fifteen inches diameter at base, and two inches diameter at top; this long cone may be supposed to be bent so as to form three perpendicular branches—which is the supposed reason for its name Trio. Just beyond the first bend is a collar, to which is attached the smoke pipe, and in this collar is fixed a damper, and in the same collar is an opening just large enough to let in the small end of the tapering trunk. In kindling the fire the damper is opened just long enough for the fuel to ignite. It is then fully closed for the day. The only escape for the smoke and gases, is through the whole circuit of the long tapering trunk, and they are discharged out of the small end of the trunk into the before named collar, and thence into the smoke pipe. Thus, when the damper is closed, the smoke and gases are confined in this trunk, and exposed to so high a heat from the direct rays and action of the fire, as to cause the heated current to continually impinge against the whole of its large surface, quite exhausting the heat from the fuel, and using the formerly wasted smoke and gases for generating a powerful heat, and greatly economizing the use of fuel for warming purposes.

A much more satisfactory idea can be formed of the principles of the stove from personal inspection, than from any description that can be given. The experience of two years enables us to speak with knowledge of its excellence."—*Boston Atlas*.

The invention spoken of at the head of this article, just patented, has many valuable improvements over the Trio. We will attempt to describe this invention: when applicable to a steam or hot water boiler, the fire chamber is broad and shallow; directly over, and resting on the edges of the fire chamber, is one broad cone or radiator, terminating at or nearly at a point some four feet above the fire box; out of this main cone are as many small cones as can well enter the main cone, which when completed resembles a pyramid of cones. This pyramid of cones is surmounted by a large circular chamber, into which the outside series of cones enter for drawing off equally the non-combustible products of combustion, and what escape heat there is, from the cones, where it is distributed through the circular chamber and becomes fully exhausted before escaping to the chimney.

The wonderful economy in the consumption of fuel, and the great power of generating heat, are caused mainly by holding a large amount of heated smoke and gases suspended in a large number of cones directly over the fire box. The continuous taper of these cones so reduces the whole amount of area at their terminus on entering the circular chambers, as to make the combined area about equal to that of the escape smoke pipe at the centre of the circular chamber; thus preventing the products of combustion from escaping until they part with all that is combustible, which is thoroughly done by the direct action of the rays of light and heat being brought to bear upon the heated smoke and gases confined in the cones; and by thus highly heating the gases, they become luminous and reflect their rays of light and heat not only up the cones, but also downward to the bases of the semi-cones and on to the top of the fuel in the fire box, thus fully consuming every thing that is combustible in the fuel. The action of heat brought to bear or impinge against these cones, is not unlike the action of the light and rays of the sun brought to bear on the sun glass, when its rays are brought to a focus, or the power of the blow pipe to produce an intense heat by concentrating the wind to a focus. Notwithstanding the small contracted openings at the terminus of the cones, the draft is sure to be good; owing to the intense heat in the cones, the small jets of heat that escape into the circular chambers suffice to keep it warm, and insure a good draft without the waste of fuel. This invention is now being brought out for various purposes, when the public will have an opportunity to decide whether these remarks are exaggerated or not.

CHARLES J. PETERS, Agent, No. 4 Spring Lane, up Stairs.

BOSTON DAILY ADVERTISER,

ESTABLISHED MARCH 1, 1814.

Published every Morning, except Sundays. . . . Terms, \$8.00 per annum in advance.

NATHAN HALE AND CHARLES HALE, EDITORS.

CHARLES HALE, Publisher.

This is a first-class newspaper of the largest size published in Boston. It is printed upon new type, obtained within the present month; upon white paper, of the best quality used for newspapers. The BOSTON DAILY ADVERTISER is conducted with care and diligence, and is believed to possess a favorable character wherever it is known. With the introduction of the new type, a new order of arranging the contents has been adopted, which allows of a considerable increase in the quantity of reading matter, and enables us to present the news as received at the latest hour, in the fullest extent, without inconvenience, and without curtailing the space devoted to the various regular departments of intelligence. While we propose to retain all the old characteristics of the paper, which have given it its favorable reputation, we expect to introduce such new features as shall make it approach as nearly as possible the highest standard of excellence for a daily newspaper published at the present day in the capital of New England.

Every effort is used to present in the columns of the BOSTON DAILY ADVERTISER the *News* of the day, with fullness, freshness and accuracy, and, further, to discuss the topics of the day freely, fairly, and with independence, at the same time that the utmost care is taken to express no opinion which is not formed after careful personal examination by the editors of the subject under consideration.

The attention of the public is respectfully called to the following characteristics of the BOSTON DAILY ADVERTISER:

1. Its editorial articles, which are numerous, written with care, and express only the opinions of the editors. No pay is ever received for anything appearing as editorial.
2. The regularity and fidelity with which all public documents and matters of permanent value, are presented in its columns.
3. The copiousness of its summaries of foreign intelligence, which are prepared with laborious care from ample materials.
4. The perfection of its marine intelligence. Its leading position in this department is believed to be generally admitted without question.
5. The accuracy and independence of its financial and commercial intelligence, which is so prepared as to remove it beyond suspicion of aiding individual interests.
6. The accuracy and fullness of its reports of the proceedings of the Massachusetts Legislature, the approaching session of which is likely to be one of extraordinary interest.
7. Its literary intelligence, and the impartiality of its notices of books, pictures, public amusements, &c. Extracts from forthcoming works in advance of their publication are frequently printed in its columns.

The BOSTON DAILY ADVERTISER is not a "party organ," but has supported to the utmost of its ability the policy of the whig party, from the honest conviction that that was the best adapted for the welfare of the State and Nation.

An arrangement has been made for the exclusive publication in the BOSTON DAILY ADVERTISER of *special despatches* from Washington, from a correspondent enjoying unusual facilities for obtaining fresh and correct information at the seat of government. These are additional to the regular telegraphic despatches.

The SEMI-WEEKLY ADVERTISER and WEEKLY MESSENGER contain substantially the same reading matter as the DAILY ADVERTISER, but less space is occupied with advertisements, of which very few appear in the WEEKLY MESSENGER.

The weekly statement of the condition of the banks in the City of Boston, and the monthly statement of the banks in the State of Massachusetts out of Boston required by the law of the State, are published *by authority* in the BOSTON DAILY ADVERTISER and also appear, without delay, in the SEMI-WEEKLY ADVERTISER and WEEKLY MESSENGER.

These papers are printed for mailing on a sheet weighing "not over 1½ ounces," and are accordingly chargeable for postage at the lowest rate, viz, a quarter of a cent for each paper within the State, when paid quarterly in advance.

A quarter's subscription to the daily, *postage included*, thus costs but \$2.20; to the semi-weekly, but \$1.07; and to the weekly, but 54 cents. Persons residing in the country are invited to try the experiment of a subscription to a Boston paper for this period, at these rates.

Office, 6 Congress Street, Boston.

Boston, December 15, 1854.

[From the *National Intelligencer*.]

THE BOSTON DAILY ADVERTISER.—"A paper so wise, so instructive, so cautious and so truthful, deserves every success; and its success is a credit to the community which it ably serves and enlightens."

[From the *Albany State Register*.]

THE BOSTON DAILY ADVERTISER.—"It is one of the very best newspapers in the United States, and we take the liberty of rejoicing in its prosperity."

[From the *New York Shipping List*.]

THE BOSTON DAILY ADVERTISER.—"The Daily has long since acquired the reputation of being the best marine journal in the country, and as a literary and political publication, it ranks deservedly high."

[From the *Yarmouth Register*.]

THE BOSTON DAILY ADVERTISER.—"We are unable to discover any points in the witticisms that are sometimes attempted at the expense of the "Advertiser," implying that it is lacking in enterprise in the collection of the news of the day. A glance at its columns will show that it is fully up to the mark, and its matter is evidently prepared with much care; while in one department, and an important one to Cape readers,—we refer to the *shipping intelligence*,—it unquestionably excels all its contemporaries in the freshness and accuracy of its reports. This department is under the direction of Mr. Ballard, the best shipping reporter in the country."

[From the *Vineyard Gazette*.]

"THE BOSTON DAILY ADVERTISER has appeared in a new dress, and looks remarkably well. The "Advertiser" is unquestionably the best paper in Boston, and we rejoice at this renewed evidence of its prosperity."

[From the *Charleston (S. C.) Courier*.]

"THE BOSTON DAILY ADVERTISER, one of the best journals in the country, made its appearance a day or two ago printed throughout in new and beautiful type."

FROM THE SAME OFFICE ARE ISSUED THE

BOSTON SEMI-WEEKLY ADVERTISER,

Published on Wednesday and Saturday Mornings. Terms, \$4.00 per annum in advance; and the

BOSTON WEEKLY MESSENGER,

Published on Wednesday Afternoons. Terms, \$2.00 per annum in advance.

PATENT AGENCY.

SAMUEL COOPER,

Late Chief Examiner in the U. S. Patent Office,

PROCURES PATENTS IN THIS AND FOREIGN COUNTRIES.

His long official connection with the Patent Office has rendered him familiar with its rules and practices, and with the history of invention in this and other countries; and this experience, with the frequent visits which he proposes making to the Patent Office, justifies him in saying that his Agency will offer to Inventors all the advantages of one located in Washington, and, in addition, those which result from a residence in the midst of mechanical and manufacturing industry.

Advice given upon all matters relating to the validity, &c., of patents, the novelty and patentability of inventions. Specifications and Drawings prepared, — Caveats filed, — Reconsiderations procured of applications that have been rejected upon imperfectly prepared papers, — Cases of interference, and applications for extension and re-issue prosecuted, — and in general, all business connected with the Patent Office, transacted with care and promptness.

British and other foreign patents procured, through prompt and confidential agents in London and Paris.

Persons residing at a distance may obtain all necessary information, and have their business transacted, by writing to the subscriber, without the trouble and expense of a visit to Washington.

He begs leave to refer those unacquainted with him to the following testimonials: —

FROM THE EXAMINERS IN THE PATENT OFFICE.

"The undersigned, Principal and Assistant Examiners in the United States Patent Office, have for several years been well acquainted with Mr. Samuel Cooper, lately a Principal Examiner in this Office, and take pleasure in stating that he is a gentleman of the highest moral character, of unquestioned knowledge in the business and practice of the office, and that his scientific attainments are such as eminently fit him for the business in which he is about to engage.

WARREN'S IMPROVED TURBINE WATER WHEEL.

This Water Wheel is too extensively known to require any explanation. It is made of cast iron, with steel buckets firmly cast into the body of the wheel, making it very firm and not liable to rust out. The curve of the bucket is always formed so as to be adapted to the particular head under which it is intended to run. They are very simple in construction and operation, not affected by ice or back water.

For Cotton and Woollen Mills, Paper Mills, Iron Works, Grist Mills, &c., where a powerful and economical wheel is required, this wheel is particularly recommended.

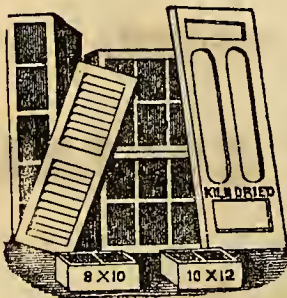

MANUFACTURED BY THE NEW ENGLAND WATER WHEEL COMPANY, WAREHAM, MASS.

JACKSON WARREN, Agent.

A sample of the Wheel can be seen at the Real Estate Register Office, 91 Washington Street, Boston, where orders can be left for Wheels, &c.

KNAPP'S DAGUERREAN GALLERY,

123 Washington St., (opposite the head of Water St.,)

BOSTON.

PICTURES taken at all times, without regard to the weather. To his pictures of children, Mr. K. would call particular attention; also to some specimens of Stereoscopic Pictures in groups and single figures, which have attracted much attention, and are almost universally admired.

The effect produced by good and by indifferent productions, is in no department of art more eminently apparent than in *Daguerreotype Pictures*.

The beholder of an indifferent specimen is at first displeased, without knowing the cause, and upon closer examination this feeling increases, to a degree bordering on disgust. The undersigned will say it is no part of his ambition to produce such pictures. At first view of a superior specimen, the attention is attracted by the graceful and easy position, the natural folds of the drapery, the delicate blending of colors, lights, and shades, imparting a mild and life-like effect to the features. So perfect is the illusion, that one can hardly believe he is gazing upon a flat surface of silver, but imagines he has been ushered into the actual presence of a friend, who seems to have forgotten his customary salutation and his power of speech. The illusion partially subsides, and gives place to admiration, which is limited only by the artist's skill.

To produce such effects he must use the utmost care in the preparation of his plates and chemicals; must possess experience in regard to the effects of light, and the chemical action of various ingredients; and above all, he must possess an intense and enthusiastic love of the art.

Mr. K., after years of careful study and extensive practical experience, presents the results to which he has attained, to which he is daily adding new specimens; and not to detract from the merits of others, he is confident he can exhibit work which cannot be excelled, at prices within the means of all. **A. H. KNAPP, 123 Washington St.**

LAUNDRY STARCH POLISH,

MANUFACTURED BY THE

AMERICAN LAUNDRY CO.,

J. DEAN, TREASURER.

This is the best and only preparation in the market which will give a beautiful and clear finish to Linen.

LAUNDRESSES who are particular that their efforts should meet with pleasing success, will find this composition a great help, as it will effectually remove those defective qualities of the Starch which cause the iron to stick and often spot the linen.

This Beautiful Polish improves the appearance of Linen, and imparts a rich lustre, which lasts much longer than any that can be produced by the use of the ordinary articles offered for this purpose. It has been extensively used, and has already found its way into our first families, and is considered by competent judges a desideratum long needed by Housekeepers. For richness of quality, beauty of polish, durability of appearance, and power of resisting damp weather, IT IS UNRIVALLED. For sale, wholesale and retail, at the office of the AMERICAN LAUNDRY COMPANY,

14 WATER STREET, BOSTON,

And by Grocers, Druggists and Periodical Houses generally throughout the Country.

# MAYNARD & NOYES' BLACK WRITING INK.

The manufacture of this Ink was established in 1816, and the quality has now been tested by the public for *nearly forty years*. During this time it has been constantly increasing in public favor and patronage, and is now the leading article in the country. Those who may be ignorant of its superiority and reputation, are invited to read the following testimonials, and to make trial of it themselves. When the best judges, after using it twenty and more years, express themselves in one manner concerning its superior excellence, it is quite evident that no one *need* be troubled with *bad Ink*.

*Bank of State of North Carolina, Raleigh, March 4, 1847.*

Messrs. MAYNARD & NOYES: Gentlemen,—Your Writing Ink has been in almost constant use by the officers of this banking house for the last *fifteen years*, and has always been preferred to any other brand. *It flows freely from the pen, and does not mould; and the color, though sometimes pale when first opened, becomes a beautiful permanent black.* I have been a regular consumer of it myself during this time, excepting when curiosity has led me to make trial of other kinds, and take pleasure in being able to speak so favorably of it, and trust that my opinion, founded on such long experience, will induce many who may not be so well acquainted with its merits to give it a trial.

Yours, respectfully, C. DEWEY, Cashier.

Messrs. MAYNARD & NOYES: Gentlemen,—We are happy in being able to say, that we entirely concur in the opinion expressed above of your Writing Ink, by Mr. Dewey, the Cashier of this Institution.

Respectfully yours,  
DUNN CAMERON, Pres.  
S. W. WHITING, Teller.  
D. DUPRE, Bookkeeper.

*Boston, January 10, 1848.*

Messrs. MAYNARD & NOYES: Gentlemen,—It is now, I believe, more than twenty years since the School Committee passed an order for using your Black Writing Ink in the City Schools. I have used it during that period, and deem it a *first rate article*, and cheerfully recommended it to others. *It flows freely from the pen, and increases in blackness after being committed to paper, and the color is durable.* I know of no Ink equal to yours, and I have tried many kinds, both English and American.

P. MACKINTOSH, JR.  
Principal of Writing Dep. Hancock School.

*Office of Merchants' Ins. Co., Boston, Nov. 18, 1847.*

Messrs. MAYNARD & NOYES: Gentlemen,—I have used your Writing Ink for the last sixteen years. In 1840, I gave you a certificate of its excellence, and having continued its use ever since to my entire satisfaction, my opinion is confirmed in its superiority. *It flows freely from the pen, and is, in all respects, the best Ink I have ever used.*

GEORGE HOMER, Secretary.

*Registry of Deeds, Boston, Nov. 20, 1847.*

Messrs. MAYNARD & NOYES: I have made use of your Writing Ink for the Recording of Deeds, &c., the past *twenty-five years*, and having found it to suit

my wishes and purposes entirely, take pleasure in renewing my testimonial of its superiority. From the appearance of the records in my office, I am satisfied it is superior to any I have used, and consider it particularly adapted for all purposes where *permanency of color is requisite or desirable.* *It flows well from the pen, and does not mould; and my oldest records prove its color to be unalterably black.*

HENRY ALLINE, Register of Deeds.

*Boston Post Office, Dec. 4, 1851.*

Messrs. MAYNARD & NOYES: Gentlemen,—In 1843 I certified to the superior quality of your Writing Ink. I have continued to use it ever since that time, and take pleasure in expressing as I then did my entire satisfaction with it. It has now been used in this office more than twenty years. Other Inks have during that time been tested, but yours has been in every instance preferred. For *fluidity, blackness, and permanency, none has been found equal to it.*

GEORGE WM. GORDON, Postmaster.

*Bowdoin School, Boston, Dec. 10, 1851.*

Messrs. MAYNARD & NOYES: I have used your Ink in the Writing Department of this School during the last twenty-four years, and feel pleased in being able to express the same favorable opinion of it that I did ten years ago. It flows freely from the pen, its color is brilliant and permanent, and it combines all the necessary and desirable qualities of good ink. It has given me such entire satisfaction for so many years, that I can strongly recommend it to all of my profession, who so much need a first rate article of writing liquid.

JAS. ROBINSON, Writing Master.

*Boston, Dec. 2, 1851.*

Messrs. MAYNARD & NOYES: I am pleased in being able to say that longer experience in the use of your Ink, and the occasional trial of other kinds, have confirmed the good opinion I some years since expressed concerning it. I have used it in my weekly preparations for the pulpit twenty-one years, and have found it suit my wishes *entirely.* Its peculiar excellence is that it becomes *black* by age, at the same time it *flows easily* from the pen, and is sufficiently dark to make what is written easily to be read *immediately* after it has been committed to paper.

Yours respectfully,

G. W. BLAGDEN, Pastor Old South Ch.

## Bankers & Dealers in Exchange,

BROKERS AND NEGOTIATORS OF STOCKS,

No. 4, CORNER OF STATE STREET,

BOSTON, MASS.

B., H. & CO. draw bills upon Messrs. GEORGE PEABODY & CO., LONDON, for any amount, from £1 upwards, and payable at from one to sixty days' sight, at the lowest market rates. They also buy bills of exchange, or sell them for their owners, on commission. Circular letters of credit on Messrs. GEORGE PEABODY & CO. will be furnished to travellers in Europe or along the Mediterranean Sea. For freight or other moneys deposited with their correspondents in England, on terms which will be explained at their office, an equivalent will be paid in Boston at the current rate of Exchange, less a charge of one-half of one per cent., being half the usual banker's commission.

B., H. & CO. give their attention, also, to the purchase and sale of Stocks, at the Brokers' Board and elsewhere, both in Boston, and, by their agents, in New York and the Southern Cities. As they confine themselves to a STRICTLY commission business in this department, investors and others may be sure of an impartial and undivided attention to their interests.

Good commercial paper is also bought and sold at the most favorable rates. Capitalists preferring this kind of investment, will find a most undoubted security with a remunerating rate of interest; while banks and other moneyed institutions can employ their funds both safely and profitably, with a confidence of receiving them again in money at short intervals.
